Qus 15 → Find the most popular major.

CODE →

=====

The screenshot shows an SQL Worksheet interface. At the top, there are links for Feedback, Help, and a user profile for laxman.vashist_cs19@glia.ac.in. Below this, the title 'SQL Worksheet' is displayed. To the right of the title are buttons for Clear, Find, Actions, Save, and a Run button. The main area contains a SQL query: `select major from apply group by major having count(major) = (select max(count(major)) from Apply group by major)`. Below the query editor, there is a table with one row containing the value 'CS'. Below the table, there is a 'Download CSV' link.

```
1 select major from apply group by major having count(major) = (select max(count(major)) from Apply group by major)
```

Qus 18 → Find college where all the student have applied.

CODE →

=====

The screenshot shows the 'Live SQL' web application interface. At the top, there's a dark header with the 'Live SQL' logo, a 'Feedback' link, a 'Help' link, and a user profile 'laxman.vashist_cs19@gla.ac.in'. Below the header is a 'SQL Worksheet' section with buttons for 'Clear', 'Find', 'Actions', 'Save', and a green 'Run' button. The SQL editor contains the following query:

```
1 | select cname from apply group by cname having count(distinct sid ) = (select count(sid) from student);
```

Below the editor, the results are displayed in a table with one column labeled 'CNAME' and one row containing the value 'Berkeley'. A 'Download CSV' link is visible below the table.

Qus 19 → Find sid of student who have not applied to Stanford.

CODE →
